

Centralized Intern Training

What is Centralized Intern Training?

Centralized Intern Training, or CIT, is a 12-week process where students:

- Complete 1 week of on-line coursework
- Attend classes in Raleigh for 5 weeks
- Work at a local health department on Food & Lodging and On-Site Water Protection “homework”

WCU Intern,
Spring 2008

Who is Eligible for the Training?

Until 2007, only graduates employed by a health department were eligible. Through this program, students who meet the following criteria may attend:

- Environmental Health Students at ECU and WCU who *need* an internship*

ECU Interns,
Summer 2009

*Students who have graduated or will graduate before the internship begins are not eligible.

Why Should I Consider CIT for my Internship?

First, to work in a North Carolina local Public Health Departments you must:

- Graduate with 30 hours of science from a 4 year college or university, and
- Complete CIT Training

Second, it is a paid internship. Interns receive 4 payments over the 12-week period totaling \$5,000. This stipend is for all expenses related to CIT.

During the Internship, you will accompany an Environmental Health Specialist to Inspect:

- Restaurants
- A meat market
- A tattoo parlor*
- A motel or other lodging*
- An institution (hospital, rest home or nursing home)*

You will also accompany an EHS for:

- 3 New soil/site evaluations
- Final inspections of new installations of onsite systems*
- 1 complete final inspection from tank and drain field installation prior to the covering of the system

***Based on availability within the county.**
